PREET KUMAR

Software Engineer | Full Stack Developer | React.js | Next.js | Node.js

pksiet84@gmail.com 6397388835 Noida, Gautam Buddha Nagar linkedin.com/in/preet-kumar-1b738523a

SUMMARY

Software Engineer with 3 years of experience building scalable web applications using React.js, Next.js, Node.js, and NestJS. Skilled in RESTful APIs, MongoDB, MySQL, performance optimization, and responsive UI development. Experienced in delivering production-ready, maintainable solutions in Agile environments.

EDUCATION

Saraswati Institute of Engineering & Technology — B.Tech (Computer Science) **July 2016-Oct 2020**

CGPA: 6.87/10 | First Division

TECHNICAL SKILLS

Programming Languages	• HTML, CSS, JavaScript (ES6+), Typescript, Node.js, Express.js
Frontend Frameworks	• React.js, Next.js (SSR/SSG), Redux, Zustand, Context API, TanStack Router, Vite
UI Frameworks	• Tailwind CSS, Bootstrap, Ant Design, Chakra UI
Performance	• SSR, SSG, Lazy Loading, Code Splitting, Caching, SEO
Database	• MongoDB, MySql
Real Time	• Socket.IO, Server-Sent Events(SSE)
Tools	• Git, Bitbucket, Jira

EXPERIENCE

Software Engineer | Khan Global Studies **July 2023-Present | Noida, India**

- Developed and maintained scalable, responsive web applications using React.js, Next.js, Node.js, and NestJS.
- Designed reusable UI components and applied state management (Redux, Zustand, Context API) to improve maintainability.
- Optimized application performance using SSR, SSG, lazy loading, code splitting, and caching, improving load speed and UX.
- Collaborated with cross-functional teams in Agile development using Git, Bitbucket, and Jira to ship production features.

PROJECTS

Khan Global Studies - EdTech Platform https://www.khanglobalstudies.com/

Next.js, React.js, Node.js, Tailwind CSS

- Developed and maintained scalable web applications using Next.js, React.js, TypeScript, and Tailwind CSS for an online education platform serving multiple competitive-exam categories.
- Built and optimized course, test-series, study-material, and learning modules, enabling users to discover and access educational content across multiple exam categories
- Implemented server-side rendering (SSR), static generation, lazy loading, and image optimization in Next.js to improve page performance, SEO, and user experience.
- Developed responsive and reusable UI components for course listings, course details, dashboards, forms, tables, filters, and other learning-platform interfaces.

Bot Sphere - Full-Stack Conversational Platform https://campaign.kgs.live/

Vite, React.js, TanStack Router, Socket.IO, SSE, NestJS, MongoDB, Redis

- Developed a full-stack conversational platform using React.js and Vite on the frontend and NestJS on the backend.
- Implemented real-time communication using Socket.IO and Server-Sent Events (SSE) for live messaging and agent-user interactions.
- Developed NestJS backend APIs for chat management, user operations, bot workflows, and template-based messaging.
- Integrated MongoDB for persistent data storage and Redis for caching, improving data access speed and overall application performance.
- Implemented WhatsApp template-based messaging features, including Marketing and Utility templates, enabling businesses to create, manage, and send predefined messages.

Khan Global Studies - Learning & Analytics Dashboard https://app.khanglobalstudies.com/login

Next.js, React.js, Zustand, Ant Design, Tailwind CSS, REST APIs

- Developed features for a student learning platform enabling users to access courses, learning content, study materials, and exam-oriented resources.
- Implemented authenticated user workflows including login, protected routes, user-specific content, and role-based access.
- Built reusable components for course dashboards, content navigation, learning modules, tables, filters, and interactive user interfaces.
- Developed an interactive learning and analytics dashboard to display course, test-series, and study-material data, including student performance, answer-writing activities, and learning analytics.
